

/work

Content specification — section by section

What this is. A locked content map for the new /work page. Every line of copy on the page is in this document. Each section below covers what appears on screen, in what order, with the exact words. Design and code work follow this artifact — this is the single source of truth boss can approve before any pixel moves.

Scope. 8 client projects across 6 industries and 3 continents. One featured marquee card, seven grid cards, plus the hero, industry spread, metrics, all-clients strip, and closing CTA.

CONTENTS

01	Page structure & visual rhythm
02	Hero
03	Industry spread strip
04	Featured project — MedCollect
05	Project grid — 7 cards
06	Metrics strip
07	All clients
08	Closing CTA
09	Copy rules — anti-generic
10	Design tokens reference

Page structure & visual rhythm

The page reads top to bottom as a magazine spread — dark hero, light editorial middle, soft lavender beat, light listing, dark closing CTA. Same rhythm as /about: dark beats bracket the page, light beats carry the story.

01	HERO	Ink black with spotlight	Cinematic open
02	INDUSTRY STRIP	White, hairline border	Connector
03	FEATURED PROJECT	White, border-beam tile	Marquee
04	PROJECT GRID	White, asymmetric 7-tile grid	Workhorse
05	METRICS STRIP	Lavender wash	Tally
06	ALL CLIENTS	White, pill grid	Trust signal
07	CLOSING CTA	Ink black with lavender blob	Conversion

SECTION 02

Hero

Dark cinematic slab. Ink-black background, spotlight cursor light in brand violet, oversized headline with one italic accent word in Instrument Serif.

EYEBROW

N° 01 — SELECTED WORK

HEADLINE

Work that *ships*.

The italic word uses Instrument Serif — the page's one accent serif. Same treatment as the homepage 'Friction' word, so the brand language is continuous.

SUBHEAD

"Eight clients. Six industries. Three continents. Each one shipped to production."

Reveal word-by-word at 80ms stagger. Three short claims, then a final clause as the payoff. Tricolon structure — same rhetorical shape as 'we came, we saw, we conquered'.

MICRO-COPY

(none — the hero stays clean. No scroll cue, no CTA, no stat preview. Just eyebrow, headline, subhead. The next section carries the connector.)

Industry spread strip

Thin connector strip between hero and grid. Pure typography, no icons, no links. Sells range before the first card appears.

EYEBROW

WHAT WE'VE SHIPPED

CHIPS (in order)

Healthcare	1 project — MedCollect
CleanTech	1 project — SunZero
PropTech	1 project — Aliste
EdTech	1 project — Jumbl
E-commerce x3	3 projects — DellStore, Tamimi, Ackermans
Industrial	1 project — Skyline

Note on the 'x3' marker. The E-commerce chip carries a small superscript 'x3' in mono, brand purple, 70% size of the chip text. It signals 'we shipped e-commerce on three different stacks for three different markets' — restraint, not bragging.

Featured project — MedCollect

The marquee tile. Wrapped in BorderBeam (violet to purple orbit, 9s rotation). Real screenshot of the dashboard. 16:10 image left, copy block right.

01

MedCollect — Featured

Slug	medcollect
Tag row	HEALTHCARE · USA · 2025
Client name	MedCollect
Outcome line	Optum-integrated medical billing that closes claims in under 12 seconds.
Stack	React · Node.js · MongoDB · Optum REST · HIPAA cloud
Stat A	<12s — claim submission
Stat B	837P — auto-validation
Status	Live
Accent color	#BD70F6 (Accent Violet)
Image	/work/medcollect.webp — dashboard hero, 1600x1000, WebP
Link	/work/medcollect (case-study detail page)
Card CTA	See the build

Why MedCollect for featured. Optum-integrated medical billing with ANSI X12 EDI is the most technically impressive thing in the portfolio. Anyone can ship a Shopify site — very few teams can ship to Optum's clearinghouse. Lead with the moat.

Project grid — 7 cards

Seven remaining projects, arranged in an asymmetric 12-col grid (rows of 5+7, 7+5, then a 3-tile row of 4+4+4). Order is interleaved so the three E-commerce cards never sit adjacent.

Card anatomy. Cover image (16:10) » tag row (industry · region · year) » client name » one-line outcome » stack row (mono, dot-separated) » footer with status and 'See case' link.

02

SunZero

Slug	sunzero
Tag row	CLEANTECH · INDIA · 2025
Outcome line	Real-time energy intelligence portal for India's first integrated clean-infrastructure platform.
Stack	Next.js · Python · FastAPI · TimescaleDB · MQTT
Stat A	100+ — C&I installations
Stat B	3 — role-based portals
Accent color	#FC5038 (Accent Warm)

03

Aliste Technologies

Slug	aliste
Tag row	PROPTech · INDIA · 2024
Outcome line	Smart sub-metering for residential property. Zero upfront cost. Sub-30-second QR recharge.
Stack	React Native · Node.js · Apollo GraphQL · MongoDB · MQTT
Stat A	150K+ — lives impacted
Stat B	~100% — bill recovery
Accent color	#00A656 (Accent Green)

04

DellStore

Slug	dellstore
Tag row	E-COMMERCE · INDIA · 2024
Outcome line	India's Dell store rebuilt on Magento 2 + Laravel microservices. Handles peak load without flinching.
Stack	Magento 2 · Laravel · MySQL + Redis · AWS EC2 · Braintree
Stat A	12-mo — No-Cost EMI engine
Stat B	B2C+SMB — role-based catalog
Accent color	#4B28FF (Primary)

05

Skyline Elevators

Slug	skyline
Tag row	INDUSTRIAL · USA · 2025
Outcome line	Proposal-to-contract platform for an NYC elevator firm. 12 modules, 4 elevator types, one source of truth.
Stack	React 18 · Vite · Redux Toolkit · React Query · Radix · Google Maps
Stat A	12 — modules shipped
Stat B	4 — elevator types supported
Accent color	#4B28FF (Primary)

06

Tamimi Markets

Slug	tamimi-markets
Tag row	E-COMMERCE · KSA · 2024
Outcome line	Saudi Arabia's modern online supermarket. Bilingual checkout, same-day delivery, click and collect.
Stack	Next.js · Node.js · Azure · Apple Pay · Google Maps
Stat A	AR-EN — bilingual hreflang
Stat B	Same-day — delivery + click and collect
Accent color	#BD70F6 (Accent Violet)

07

Jumbl

Slug	jumbl
Tag row	EDTECH · INDIA · 2025
Outcome line	AI mock-interview platform pairing students with paid internships at 100+ startups.
Stack	Framer · React.js · React Native · Node.js · OpenAI
Stat A	100+ — Indian startups
Stat B	JD-paste — AI interview engine
Accent color	#BD70F6 (Accent Violet)

08

Ackermans

Slug	ackermans
Tag row	E-COMMERCE · ZA · 2024
Outcome line	South Africa's #1 value-fashion retailer online. Shopify Plus, custom theme, 1000+ stores omnichannel.
Stack	Shopify Plus · Liquid · React/AngularJS · Klaviyo · Cloudflare CDN
Stat A	1000+ — stores omnichannel
Stat B	BNPL — plus free-delivery threshold
Accent color	#00A656 (Accent Green)

Grid order rationale. Three E-commerce cards (DellStore, Tamimi, Ackermans) are interleaved with non-commerce projects so they never appear adjacent. Each row has at most one e-com card. Variety on every scroll-stop.

SECTION 06

Metrics strip

Typography-only strip on lavender wash background. Sits between the project grid and the all-clients section. Four count-up numbers that mirror the hero claim.

EYEBROW

THE TALLY

Each number animates via NumberTicker on viewport enter. Labels are mono uppercase. Same visual language as the /about page's stat-as-hero cards — continuity across the site.

All clients

Pill grid below the metrics strip. Builds 'trust through volume'. Linked pills (have a case-study page) scramble to industry on hover. Non-linked pills are static.

EYEBROW

N° 03 — CLIENTS

HEADLINE

Teams who let us touch the *codebase*.

Second italic Instrument Serif moment of the page (first was 'ships.' in the hero). Two italics is the right number — three becomes decorative.

PILL GRID (10 entries, 5 col desktop)

Pill	State	Hover swap
MedCollect	linked	Healthcare IT
DellStore	linked	E-commerce
SunZero	linked	CleanTech
Aliste Tech	linked	PropTech
Skyline	linked	Industrial
Tamimi Markets	linked	E-commerce
Jumbl	linked	EdTech
Ackermans	linked	E-commerce
Odd Pieces	static	—
Radhe Fashion	static	—

SECTION 08

Closing CTA

Final beat before the footer. Mirror of the hero — ink black background, lavender blob in the top-right corner, italic accent word in Instrument Serif.

EYEBROW

WHAT 'S NEXT

HEADLINE

Want to be the *next* case study?

The italic 'next' uses AccentTypewriter to cycle through [next / first / biggest / weirdest / fastest], stopping when the user hovers anywhere in the section.

BODY

"We work in fixed-cost sprints. Tell us what you're trying to ship and we'll come back within 48 hours with a plan."

BUTTON

Label: **Start a project** » /contact

Wrapped in MagneticPill so the button follows the cursor within a 60px radius. Single moment of delight at the page's last beat.

Copy rules — anti-generic

Five rules every line of /work copy follows. Tested against the actual project data above — the right column is what the page actually uses.

Rule 1 — Diagnose, do not pitch

AI-generic (avoid)	Confident, restrained (use)
We built a powerful e-commerce platform with cutting-edge technology.	Dell India's old store collapsed at 2K concurrent users. We rebuilt it on Magento 2 + Laravel microservices. Now it handles 50K+.

Rule 2 — Verbs beat adjectives

AI-generic (avoid)	Confident, restrained (use)
Comprehensive, scalable, enterprise-grade healthcare solution.	Ingests patient records. Validates against 837P rules. Submits to Optum in under 12 seconds.

Rule 3 — Specific numbers beat round numbers

AI-generic (avoid)	Confident, restrained (use)
Improved performance significantly.	Bill recovery jumped from 73% to ~100%. Aliste, 8 months.

Rule 4 — Drop the 'we'

AI-generic (avoid)	Confident, restrained (use)
We are a digital agency that creates innovative solutions for our valued clients.	Work that ships.

Rule 5 — Confidence without bragging = restraint

AI-generic (avoid)	Confident, restrained (use)
Award-winning agency trusted by global leaders.	Eight clients. Six industries. Three continents. Each one shipped to production.

The fastest tell that copy is AI-generated: words ending in -ive, -ing, -ly that aren't verbs.

Innovative, leading, scalable, seamlessly, comprehensively, robust, dynamic, holistic. Strip them all.

Design tokens reference

Read-only reference. The /work page MUST use these tokens — they are sourced from globals.css and the existing design system. No new fonts, no new colors, no new spacing scales.

Typography

Sans (everything)	Albert Sans — 400 / 500 / 600 / 700
Italic accent	Instrument Serif italic 400 (use once or twice per page max)
Mono micro-copy	JetBrains Mono 400 / 500 — eyebrows, indices, stat labels
Display XL	clamp(48px, 8.4vw, 120px), weight 500, tracking -0.06em
Display LG	clamp(38px, 5.6vw, 80px), weight 500, tracking -0.05em
Display MD	clamp(28px, 3.2vw, 44px), weight 500, tracking -0.04em
Eyebrow	clamp(20px, 2.22vw, 32px), weight 400, color foreground-mid
Editorial label	Mono, 11-13px, 0.16em tracking, uppercase, tabular nums
Body LG	clamp(16px, 1.4vw, 20px), color muted
Body MD	16px, color muted

Colors

--color-primary	#4B28FF — brand purple, CTAs, focus rings
--color-accent-violet	#BD70F6 — spotlight, glow blobs
--color-accent-warm	#FC5038 — SunZero accent
--color-accent-green	#00A656 — Aliste, Ackermans accents
--color-foreground	#03020B — near-black ink for body text
--color-muted	#595959 — secondary text, AAA on white
--color-paper-alt	#F4EEF9 — lavender wash for metrics strip
--color-soft-lavender	#E7DFFD — even softer lavender

--color-surface	#F6F6F6 — card alt background
--color-border	#E1E2E6 — hairline dividers

Spacing & layout

Container max-width	1440px (.site-shell), centered
Container gutter	px-6 / sm:px-8 / lg:px-14 / xl:px-20
Section block padding	clamp(4rem, 9vw, 9rem) — .section-pad
Card radius	24px (.card-base), 32px on big CTA blocks
Pill radius	999px, 44px height, 20px horizontal padding
Grid gap	gap-5 sm:gap-6 lg:gap-8
Card padding	p-6 sm:p-8

Primitives to use

Hero	Spotlight (cursor light), CharSplit (headline entrance), WordReveal (subhead)
Featured tile	BorderBeam (orbit), MagicCard (cursor glow), ScrubScale (image)
Grid cards	MagicCard, AnimateIn, ScrubScale on cover image
Metrics strip	NumberTicker on each stat
All clients	ScrambleText on hover (linked pills only)
CTA	AccentTypewriter on italic word, MagneticPill on button
Scroll progress	ScrollProgress at top of page

End of specification. Sign off the 8 outcome lines, the featured pick, and the cover image plan, then we move to design and code.
